PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience managing customer experience analytics and reporting operations across 8+ Fortune 500 enterprise accounts, including Enterprise Holdings, US Cellular, Discover Financial, Foot Locker, and Jack in the Box. Proficient in SQL, Python, Advanced Excel, and Power BI, with hands-on experience in data validation, dashboard QA, survey analytics, SFTP pipeline monitoring, and recurring client reporting across high-volume CX programs. Streamlined recurring reporting workflows, reducing manual reporting effort by ~40% through process improvements and scalable data workflows.

WORK EXPERIENCE

Data Analyst

Futurlytic Private Limited

11/2023 - Present

Bengaluru, Karnataka

- Managed customer experience (CX) analytics and reporting operations across 8+ enterprise client accounts, supporting daily, weekly, and monthly client deliverables while overseeing 10+ recurring reporting workflows.
- Applied SQL, Python (Pandas, NumPy), Advanced Excel, and Power BI to clean, validate, reconcile, and analyze customer survey datasets supporting recurring reporting workflows and ad hoc reporting requests.
- Executed dashboard QA by reconciling Power BI dashboards, SQL query outputs, hierarchy files, and survey data against business rules to ensure data quality and reporting accuracy before production releases.
- Conducted end-to-end survey testing across desktop and mobile platforms by validating multilingual survey flows, certification codes, response logic, and graphical elements before production deployment.
- Delivered weekly and monthly client reporting deliverables, including operational scorecards, dashboard performance reports, hierarchy reports, and executive PowerPoint presentations, while collaborating with Account Managers to resolve production issues and ensure timely client reporting.

Data Analyst Intern

Futurlytic Private Limited

07/2023 - 11/2023

Bengaluru, Karnataka

- Maintained customer experience reporting processes by monitoring survey exports, SFTP file deliveries, operational trackers, and reporting datasets to identify data inconsistencies before scheduled reporting cycles.
- Prepared recurring reports by cleaning, validating, reconciling, and organizing survey datasets using SQL, Excel, Python, Google Sheets, SPSS, and Tableau for monthly client reporting.
- Performed multilingual survey quality assurance and collaborated with Account Managers and senior analysts to investigate reporting anomalies, maintain process documentation, and support timely client reporting.

SKILLS

Programming: SQL (Joins, Window Functions, Subqueries, CTEs), Python (Pandas, NumPy, Matplotlib, Seaborn)

BI & Reporting: Power BI (DAX, Power Query, Data Modeling), Microsoft Excel (Advanced), Tableau, Looker Studio, Google Sheets

Analytics: Exploratory Data Analysis (EDA), KPI Reporting, Dashboard Development, Dashboard QA, Data Validation, Root Cause Analysis, Variance Analysis, Cohort Analysis, A/B Testing, Statistical Analysis, Survey Analytics, Report Automation

Data Management: ETL Processes, Data Wrangling, Data Cleaning, RDBMS, Relational Databases

Tools & Platforms: SPSS, Jupyter Notebook, VS Code, Git, GitHub, Jira, Slack

PROJECTS

Blinkit Retail Performance & Revenue Analytics Dashboard | Power BI, DAX, Excel | github.com/AryaGadekar/Blinkit-Retail-Performance-Revenue-Analytics-Dashboard

- Built a multi-dimensional retail dashboard analyzing 8,500+ SKUs across 4 outlet types and 3 location tiers, enabling unified performance tracking by category and outlet size.
- Designed DAX-powered KPI cards with decade-long trend analysis (2011-2022), identifying peak revenue periods and consistently underperforming location tiers.
- Developed an interactive category-level dashboard across 16 product segments, highlighting high-performing SKUs to support data-driven product mix decisions.

Coral Properties: Hotel Revenue & Performance Dashboard | Power BI, DAX, Excel | github.com/AryaGadekar/Coral-Properties-Hotel-Revenue-Performance-Intelligence-Dashboard

- Consolidated performance data across 17 properties tracking RevPAR, ADR, Occupancy Rate, and Realization Percentage, delivering unified revenue visibility across 4 cities.
- Analyzed 7 booking acquisition channels, uncovering a 25% cancellation rate and recommending channel reallocation to reduce revenue loss.
- Developed week-on-week trend analysis with weekday/weekend segmentation, enabling pricing optimization decisions through structured data-driven reporting.

EDUCATION

Bachelor of Technology in Data Science

Ajeenkya DY Patil University

GPA: 9.02/10

08/2019 - 06/2023

Pune, Maharashtra

CERTIFICATIONS

Data Scientist with Python Track

Datacamp
